English Translation (convenience translation; original Spanish source controls)

Guayaquil, Ecuador | June 8, 2026

To: CUBE COLLECTIVE LLC - Attention: Executive Management, ONECARE Platform

Subject: Formal request for implementation, institutional adoption, and White Label expansion proposal for the ONECARE platform.

Dear Sir or Madam:

Through this letter, the undersigned clinical and therapeutic leadership of a private healthcare and rehabilitation group in Guayaquil hereby express our formal interest in initiating a process for the implementation, adoption, and deployment of the ONECARE platform, developed by CUBE COLLECTIVE LLC, within our professional and institutional collaboration ecosystem in the city of Guayaquil.

After analyzing the evolution of the healthcare sector, the growth of digital care models, and the need to consolidate technological tools that enable comprehensive patient management, we believe that ONECARE represents a proposal with the capacity to structurally transform the traditional care model.

Our interest is not limited solely to the operational use of the platform within our clinical and therapeutic processes; we seek to structure a strategic implementation under a White Label and Distribution model as a strategic partner, enabling the extension of access, customization, and commercialization of the technology ecosystem to associated clinics, affiliated care centers, and medical organizations with which we maintain active relationships of professional cooperation and institutional development in the city of Guayaquil.

We envision this initiative as a scalable model based on five fundamental pillars:

1. End-to-end digitalization of the patient experience

Integration of clinical history, therapeutic follow-up, medical coordination, and care traceability.

2. Interoperability and operational efficiency

Consolidation of administrative and clinical processes on a unified technology architecture.

3. White Label model for regional expansion

Possibility for allied clinics and centers to operate under their own institutional identity, supported by robust technological infrastructure.

4. Generation of new revenue streams and institutional sustainability

Conversion of clinical technology into a strategic asset through licensing, complementary services, and commercial scalability.

5. Development of a collaborative healthcare ecosystem

Creation of a connected network that strengthens continuity of care and increases coordinated care capacity.

Our vision is for ONECARE to evolve from a technology solution into an enabling infrastructure for the digital transformation of the private and collaborative healthcare sector, allowing professionals, clinics, patients, and complementary services to be connected within a single operational environment.

We consider this model to present characteristics that are especially compelling for investment and growth initiatives, as it combines:

- Scalable technology.
- Replicable model under license.
- Geographic expansion capacity.
- Generation of recurring commercial revenue.
- Integration among health, operations, and user experience.

In view of the foregoing, we formally request the initiation of the necessary conversations with CUBE COLLECTIVE LLC to evaluate conditions for implementation, licensing, White Label customization, and the institutional deployment roadmap.

We thank you in advance for your openness to building a high-impact alliance that will accelerate healthcare innovation and consolidate a sustainable and replicable growth model.

Sincerely,

Clinical & Therapeutic Leadership

Private healthcare group, Guayaquil, Ecuador
